

CODE GUIDE ELL BUSINESS VIDEO

List of Common Website Builders

Your video code will look like the following example

Business Video Code

CGI One Click Video Player code embedding.

The code below will display your video or multiple videos in a fully responsive frame on your site. [See beta] [NO OVERLAY]
[Click here to copy code below.](#)

Choose an embed size

☐ Regular
 ☐ Large
 ☒ Extra Large

☒ Autoplay video (muted)

```
<style>.cgi-rt(position:relative;pointer-events:none;height:720px;max-height:720px;max-width:1280px);@media only screen and (max-width: 510px){.cgi-rt{max-height:255px;height:255px}}</style><div class="cgi-rt"><iframe style="pointer-events:auto;position:absolute;top:0;left:0;width:100%;height:100%;border:0;box-sizing:border-box;max-width:1280px!important;max-height:720px!important;background:transparent!important;" height="720" width="1280" id="rtplayersSY" type="text/html" src="https://elocalink.tv/e/7v=sY8ap=1" frameborder="0" allow="autoplay; encrypted-media" allowfullscreen></iframe></div>
```

Implementation Guide

Note: There are various website builders available, each with its own unique features and capabilities. We have provided instructions for popular builders, which should cover most cases. If you encounter a unique situation, please reach out for assistance. We offer options to help clients without website contracts.

1. Log in to your website builder platform and access the page where you want to add the video player.
2. Determine the location on the page where you want the video player to appear. Take note of this spot.
3. Copy the supplied CGI code snippet.

Depending on your website builder, follow one of the following methods:

Please note that this is a list of common website builders. Depending on what service you use, the implementation could differentiate.

DIVI

- ▶ Edit the page where you want to add the video player using the Divi Builder.
- ▶ Click on the (+) button to add a new module.
- ▶ Search for the “Code” module and add it to your page.
- ▶ Open the Code module settings.
- ▶ Paste the copied code into the “Code” editor.
- ▶ Save or update your page to see the video player.

elementor

- ▶ Edit the page with Elementor where you want to insert the video player.
- ▶ Look for the “Elements” tab in the left panel and search for the “HTML” element.
- ▶ Drag and drop the HTML element to your desired location on the page.
- ▶ Click on the HTML element to open its settings.
- ▶ Paste the copied code into the HTML editor.
- ▶ Save or update your page to display the video player.

WPBakery

- ▶ Edit the page with WPBakery where you want to add the video player.
- ▶ Locate the “Backend Editor” or “Frontend Editor” button and click on it.
- ▶ Add a new “Raw HTML” element by clicking on the “+” icon.
- ▶ Double-click on the Raw HTML element to open the editor.
- ▶ Paste the copied code into the editor.
- ▶ Save or update your page to show the video player.

beaverbuilder™

- ▶ Edit the page using Beaver Builder where you want to insert the video player.
- ▶ Click on the (+) button to add a new module.
- ▶ Look for the “HTML” module and add it to your page.
- ▶ Open the HTML module settings.
- ▶ Paste the copied code into the “HTML Code” editor.
- ▶ Save or publish your page to display the video player.

OXYGEN

- ▶ Edit the page with Oxygen where you want to add the video player.
- ▶ Locate the “Add” button or the “+” icon to add a new element.
- ▶ Search for the “Code Block” element and add it to your page.
- ▶ Double-click on the Code Block to open the editor.
- ▶ Paste the copied code into the code editor.
- ▶ Save or publish your page to see the video player.

Avada.

- ▶ Edit the page with Avada where you want to insert the video player.
- ▶ Click on the “Fusion Builder” button to open the builder interface.
- ▶ Look for the “Code Block” element and add it to your page.
- ▶ Open the Code Block settings.
- ▶ Paste the copied code into the code editor.
- ▶ Save or update your page to display the video player.

- ▶ Edit the page in Thryv where you want to add the video player.
- ▶ Locate the “Add Element” button or the “+” icon to add a new element.
- ▶ Search for the “HTML” element and add it to your page.
- ▶ Double-click on the HTML element to open the editor.
- ▶ Paste the copied code into the editor.
- ▶ Save or publish your page to show the video player.

- ▶ Edit the page with GoDaddy Website Builder where you want to insert the video player.
- ▶ Look for the “Sections” or “Elements” tab in the left panel.
- ▶ Search for the “HTML” element and add it to your page.
- ▶ Click on the HTML element to open its settings.
- ▶ Paste the copied code into the HTML editor.
- ▶ Save or publish your page to display the video player.

- ▶ Edit the page with Wix where you want to add the video player.
- ▶ Click on the “Add” button or the “+” icon to add a new element.
- ▶ Search for “HTML Code” or “Embed” and select the appropriate element.
- ▶ Place the element in the desired location on your page.
- ▶ Click on the element to access its settings.
- ▶ Choose the option to “Edit Code” or “Embed Code.”
- ▶ Paste the copied code into the code editor.
- ▶ Save or publish your page to see the video player.

- ▶ Edit the page with Weebly where you want to insert the video player.
- ▶ Click on the “Elements” tab in the left panel.
- ▶ Search for the “Embed Code” element and add it to your page.
- ▶ Drag and drop the element to your desired location on the page.
- ▶ Click on the Embed Code element to open its settings.
- ▶ Paste the copied code into the “Embed Code” editor.
- ▶ Save or publish your page to display the video player.

SQUARESPACE

- ▶ Edit the page with Squarespace where you want to add the video player.
- ▶ Look for an “Add Block” or “+” button to add a new block.
- ▶ Search for the “Code” or “Embed” block and add it to your page.
- ▶ Paste the copied code into the code editor of the block.
- ▶ Save or publish your page to apply the changes.
